High-quality modifications

Dürr receives Supplier Recognition Award from FCA

Mexico City, April 2018 – FCA honored the entire team of Dürr de México with a Supplier Recognition Award for its exceptional performance during the launch of the Jeep® Compass at the Toluca Assembly Plant.

“Dürr was recognized for its outstanding dedication, sense of urgency and focus on quality among all suppliers working on this project”, said Steffen Zörn, Managing Director of Dürr de México, who accepted the award.

A big part of the award was due to Dürr’s building modifications and expansion. The automaker’s paint booths were equipped with the latest Dürr paint and sealing robots, application technology, paint circulation systems, special paint supply systems and a new two-tone process for the recent Jeep® Compass model. Dürr also delivered the visualization network.

With the award, FCA also recognized Dürr for its continuing support of production in Toluca after the start of operations in 2017.
